

### Vantage 3000

These pumps are perfect for laboratory applications such as dosing low volumes of shear sensitive fluids. Different models have different capabilities including simple manual transfer, remote control using external signals or switches or programmable dosing. Some of the models can be equipped with multiple heads for multi-channel pumping requirements.

### Your benefits

- Easy tube change in seconds
- Economic manual transfer version
- Programmable dosing
- Remote speed control options: 0-10V, 4-20mA and potentiometer inputs
- Simple keyboard programming

### Technical details

Flow rate	Max. 3.25 l/min	Discharge pressure	Max. 2 bar
